

 TR unites the skills and experiences of first responders to rapidly deploy emergency response teams

- TR's mission addresses two key areas:
 - Disaster Response
 - Veteran Reintegration

A New Mission

- Purpose
 - Use skills from the military for disaster relief
 - Meaningful opportunities between disasters
- Community
 - Serve alongside fellow veterans
 - Camaraderie
- Sense of Self
 - A new outlet
 - A new uniform
 - External validation

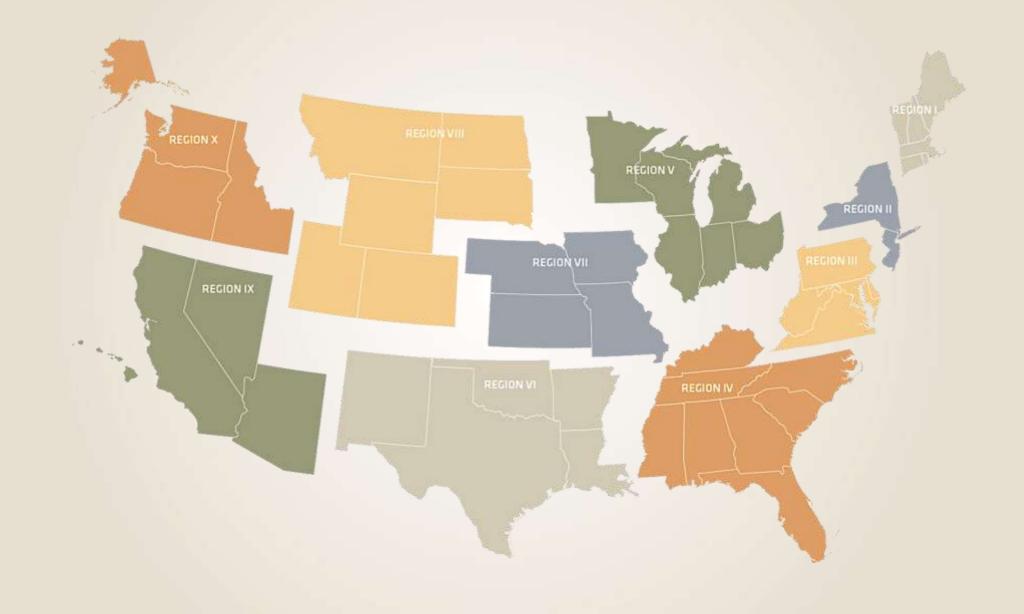

Overview

- Founded in 2010 by two Marines response to the Haiti earthquake
- Operates both domestically internationally
- Staff:
 - 47+ full-time employees
 - 150 Volunteer leaders
 - 32,000+ members distributed regions
- Team Rubicon is a 501c3 non-profit
- organization & provides all services free
- of charge

Data Mapping

Homeowner Management

Option for Homeowner Needs Contact Point

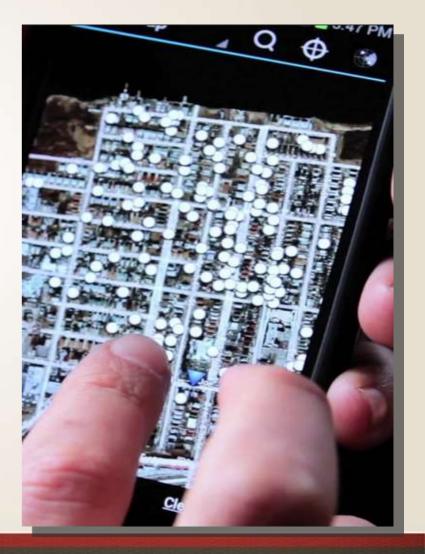

Domestic Capabilities

Drive by Window Assessments

Initial Damage Assessments Public or Private

Utility Company Assessments

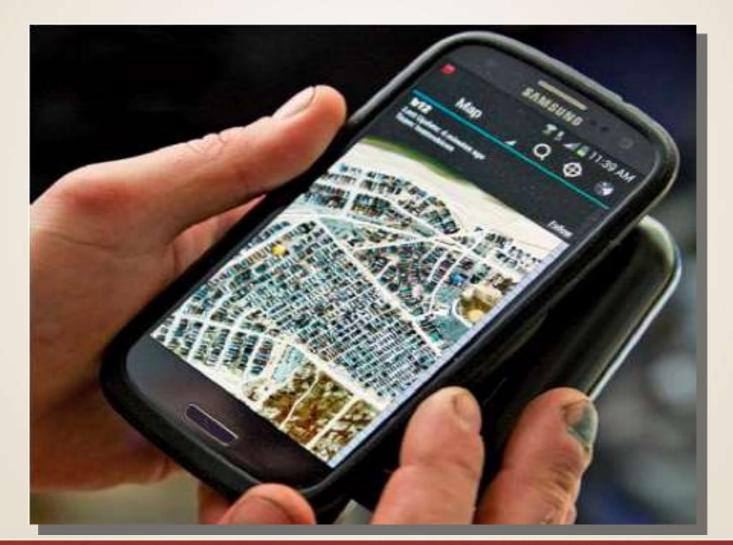

Medical / Medical Training

Water and Sanitary Health (WASH) NTERNATIONAL CAPABILITIES

When Typhoon Haivan hit the Philippines, TR deployed a first-response team 72 hours later. Focusing on emergency medicine and recon, Team 1 saw hundreds of patients in one week. Concurrently, a construction team, logisitics team, and DMAT (disaster medical assistance team) were deployed to the Philippines to provide ongoing support. Eighty-six TR members were deployed and in turn they treated upwards of 2,100 patients.

Meet Palantir

Employing Palantir

- Hand held data entry by two man recon teams going door to door
- Data uploads in real time
- Data gathered from multiple sources including recon teams, face to face, 311 calls, 911 calls, hand written notes, etc.
- Can overlay data from nearly any source we have access to including weather data, flood zones, census data, power outages, etc.

Palantir Workflow

- Create in-hour work orders
- Generate spontaneous volunteer work orders
- Share data with partner support organizations
- Share data with VOAD
- Share data with EMA's, FEMA, Governor's office and other governmental agencies to assist in response

Palantir Successes

- After Hurricane Sandy, TR utilized Palantir software to:
- Assess over 1500 properties in NY
- Fuse assessments with data collected by 311, volunteers with pads in church parking lot, hand written notes, etc.
- Effectively manage thousands of spontaneous volunteers
